## **DETAILED ACTION**

### ***Drawings***

1. The drawings were received on 2/7/2005. These drawings are approved.

### ***Allowable Subject Matter***

2. Claims 1-12 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter:

The prior art does not teach, suggest, or render obvious the combination of a restrictor portion provided at a recessed portion of the ejection outlet, wherein liquid forms a meniscus and is retained in the ejection outlet such that the restrictor portion is within the liquid, and wherein the restrictor portion has an opening and defines an entirety of a closed periphery of the opening, as recited in claims 1, 2 and 5. This invention solves the problem of providing a liquid ejection head which ejects extremely small liquid droplets, more specifically, liquid droplets, the size of which are on the order of no more than a pico-liter.
